Versatile Modern Mechanical Equipment

## - is an expanding company, specialized within stainless steel

Rustek is a modern machine works working as a mechanical workshop, and situated at no. 3, Bjørnevej in Skive.

A high professional level and many years of experience ensure a high quality of all the tasks that we undertake. We solve special projects as well as also more traditional tasks!

We develop, produce and assemble all types of tasks. We offer creative sparring for finding the solution that corresponds to your needs. Therefore, the task types may vary from customer to customer!

### **Plate Processing for all details**

We have our own laser cutting department where we can offer laser cutting of various steels for up to 20 mm thick. Similarly, we can offer flat bending work on our 170 ton Press-brake.

Working up and welding etc. as subcontractor, are other areas that are growing strongly.

As specialists in working up with steel our customers cover a wide field:

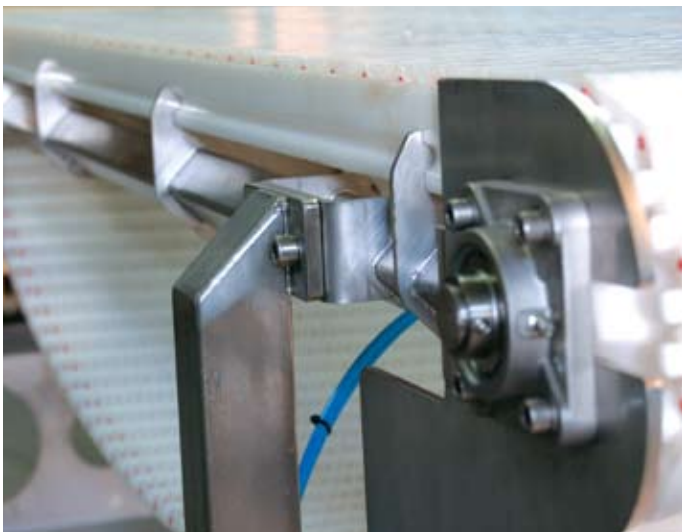

- the Food Industries
- the Shop Fittings/Decoration
- the Wood Working Industries and Furniture Industries
- the Ship Industries
- the Metallic Industries
- the Wind Mill/Energy Industries
- the Construction Industries
- etc.
